

Comprehensive visual layout and pixel-perfect screenshots of the tactical de-escalation console.

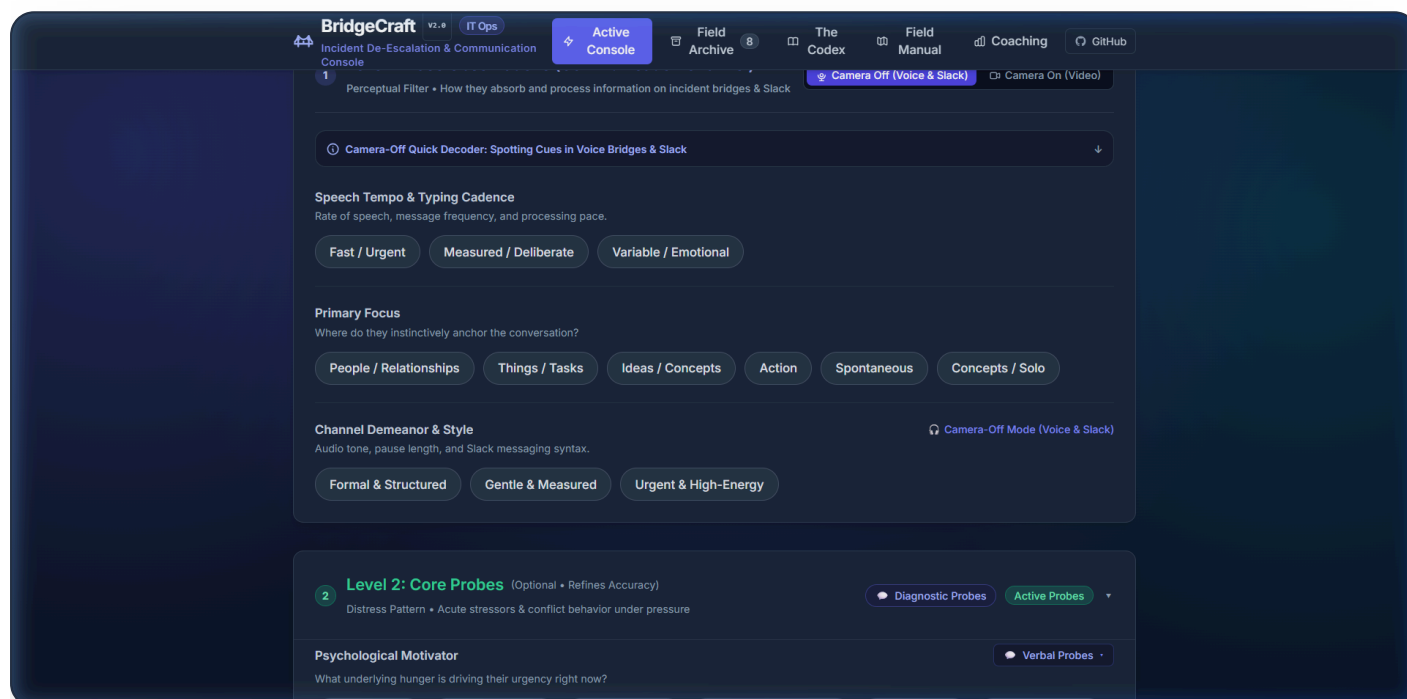

NotebookLM Note: Upload this document as a PDF alongside the Master Guide to Google NotebookLM to anchor slide deck generation, executive briefing decks, and feature walkthrough presentations on verified ground-truth screenshots and exact interface mechanics rather than synthetic approximations.

1. Active Console — Level 2

Diagnostic Probes & Passive Radar

File:
screenshots/01_active_console_diagnostic_probes.png

The core triage engine featuring Level 1 baseline indicators (Speech Tempo, Focus, Posture) and Level 2 distress probes (Psychological Motivator, Acute Stressor, Conflict Stance). Each probe card is structured with a **Passive Listening Radar** ("👂 Listen For") at the top, allowing operators to diagnose behavioral drivers purely by listening without interrupting. Beneath the radar cues, operators have instant access to **Christopher Voss "Tactical Label" alternatives** (e.g. *"It seems like standard protocol is actually slowing us down right now"*) and direct probing questions. The Acute Stressor drawer also includes the interactive **Frontline Protocol: Disarming In-Your-Face Reactive Distress** companion panel for managing acute hostility live on calls.

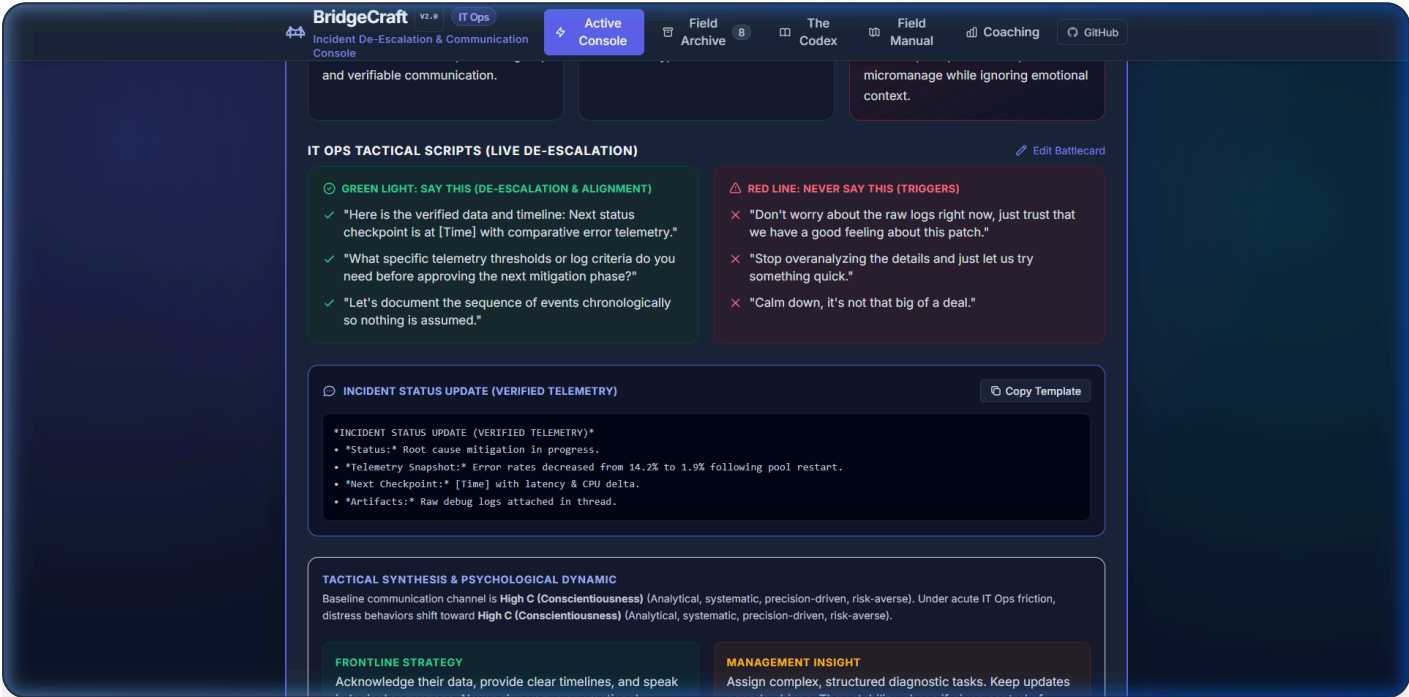

- **Passive Radar Anchor:** Top-placed listening cues eliminate awkward interrogation.
- **Frontline Protocol:** Companion briefing panel on managing physiological flooding.
- **Tactical Labels:** Calibrated non-interrogative statements disarm defensive posturing.

2. Calibrated Tactical Incident Playbook

File:
screenshots/02_calibrated_incident_playbook.png

Rendered in under 50ms upon clicking *Calibrate Incident Playbook*. Features the automatic DISC synthesis badge, psychological diagnosis, tailored "Say This / Never Say This" tactical scripts, standardized **Adult Boundary Statements** to halt volatile manipulation, and domain templates with built-in **Accusation Audits**.

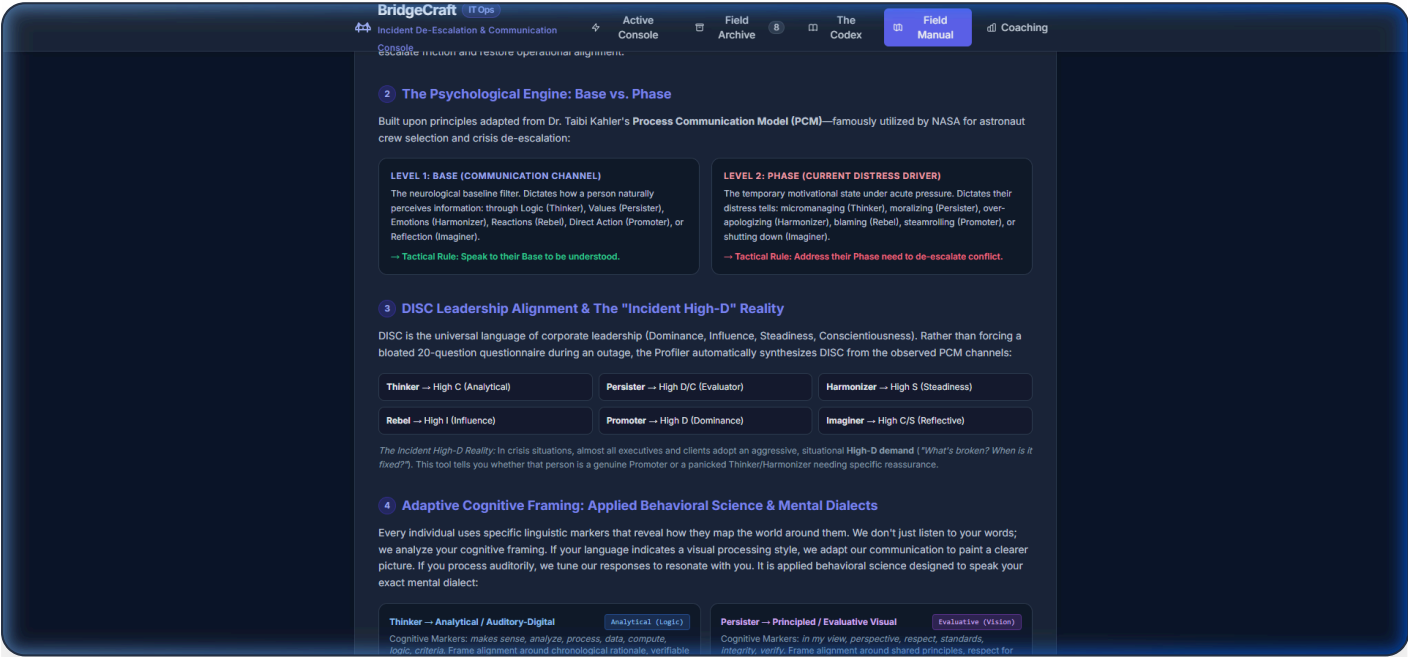

- **DISC Leadership Alignment:** High-D / High-C direct synthesis badge.
- **Boundary Scripts:** Clear, non-combative scripts holding the line against boundary pushing.
- **Action Bar:** *Save to Archive*, *Export Playbook (.MD)*, and *Edit Battlecard*.

3. Adaptive Cognitive Framing — Speaking Their Mental Dialect

File:
screenshots/03_adaptive_cognitive_framing.png

Section 4 on the Active Console. Translates behavioral cues into sensory and cognitive processing styles (Visual, Auditory, Kinesthetic, Digital Logic, Evaluative, Velocity). Provides real-time linguistic markers and verbal alignment scripts.

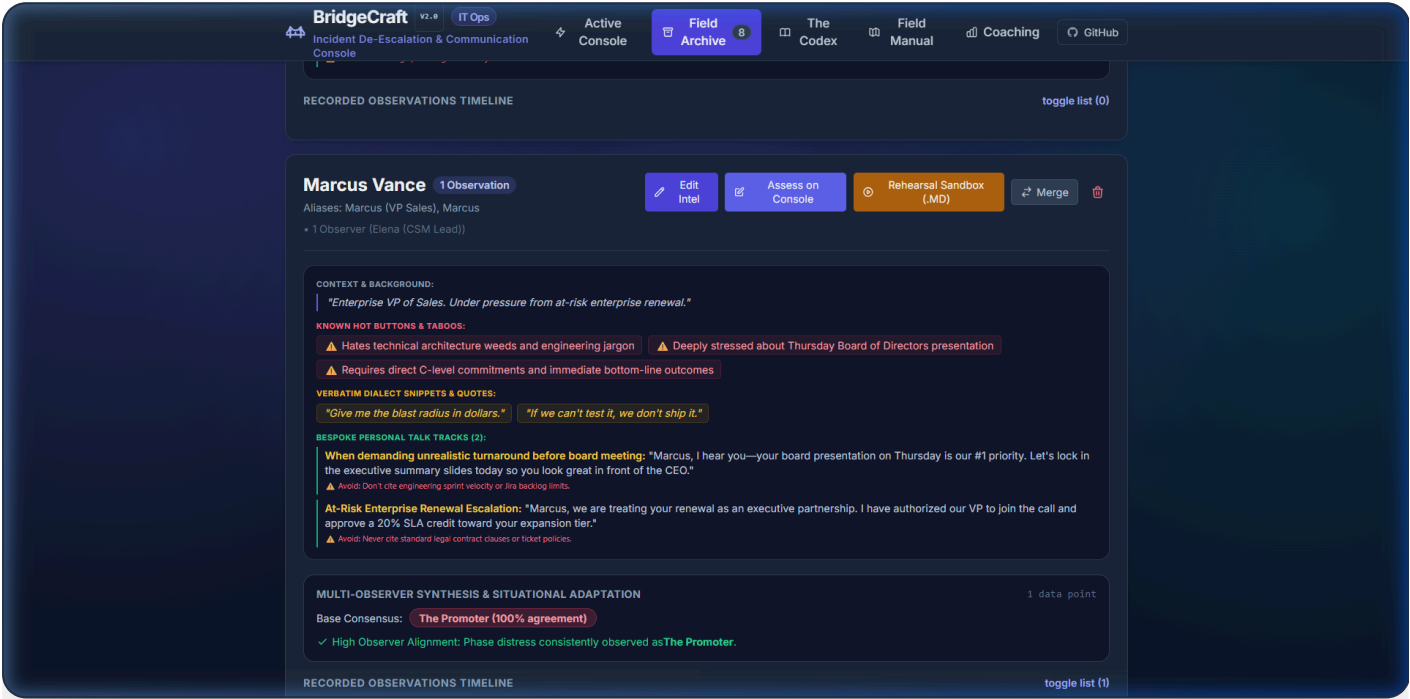

- **Linguistic Markers:** Detects whether they process in visual imagery, auditory resonance, or action verbs.
- **Ethical Standard:** Emphasizes operational resonance over interpersonal manipulation.

4. The Field Archive — Stakeholder Dossiers & Rehearsal Sandbox

File:
screenshots/04_field_archive_stakeholder_dossier.png

Persistent multi-observer library tracking individual stakeholders across outage calls and 1-on-1s. Displays consensus channel, situational adaptations, known hot buttons, and the 1-click [🗨️ Rehearsal Sandbox (.MD)] export button for external AI roleplay.

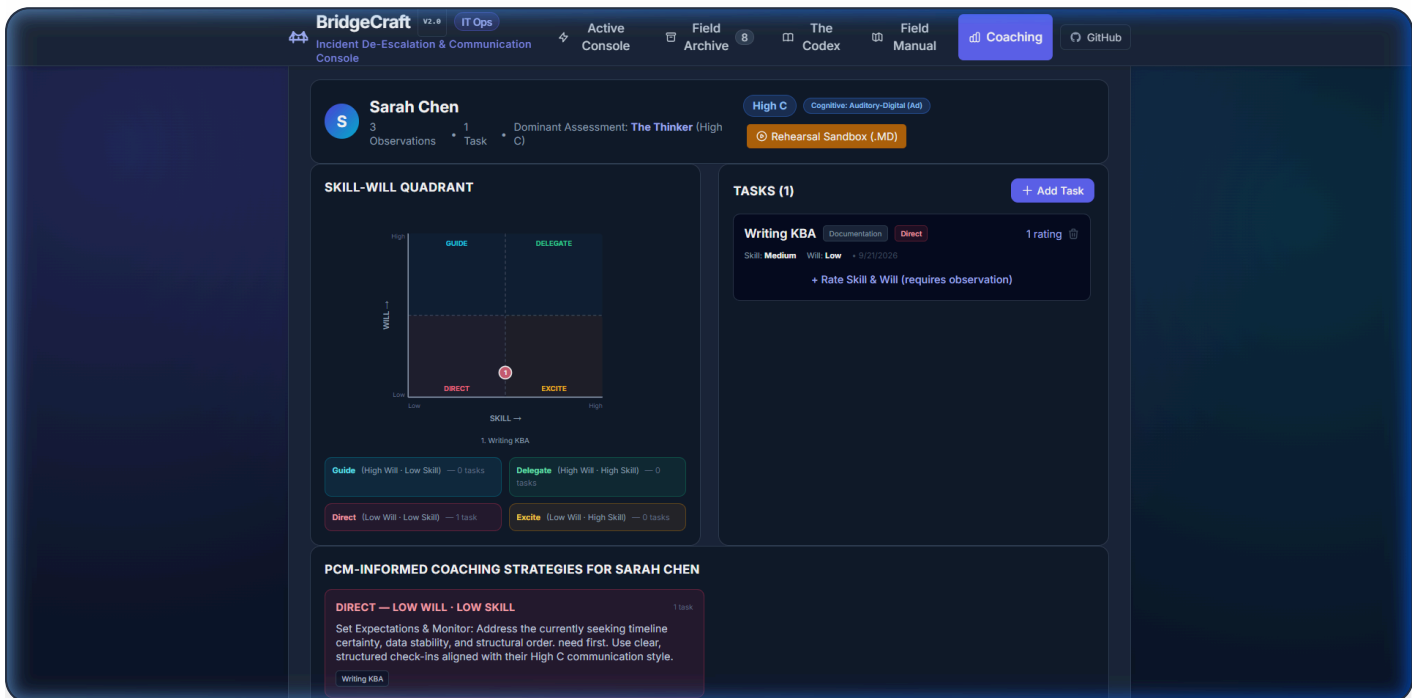

- **Consensus Engine:** 100% Base Consensus across multiple observations.
- **Rehearsal Sandbox:** Generates client-side markdown file for external LLM ingestion.
- **Merge & Aliases:** 1-click consolidation for misspellings and role aliases.

5. 1-on-1 Coaching — Interactive Skill-Will Matrix & Task Tracker

File:
screenshots/05_coaching_skill_will_matrix.png

Longitudinal coaching workspace for engineering managers and incident commanders. Allows teams to log discrete work items, evaluate situational Skill and Will levels, and view them dynamically mapped on an interactive SVG 2×2 matrix (Guide, Delegate, Direct, Excite).

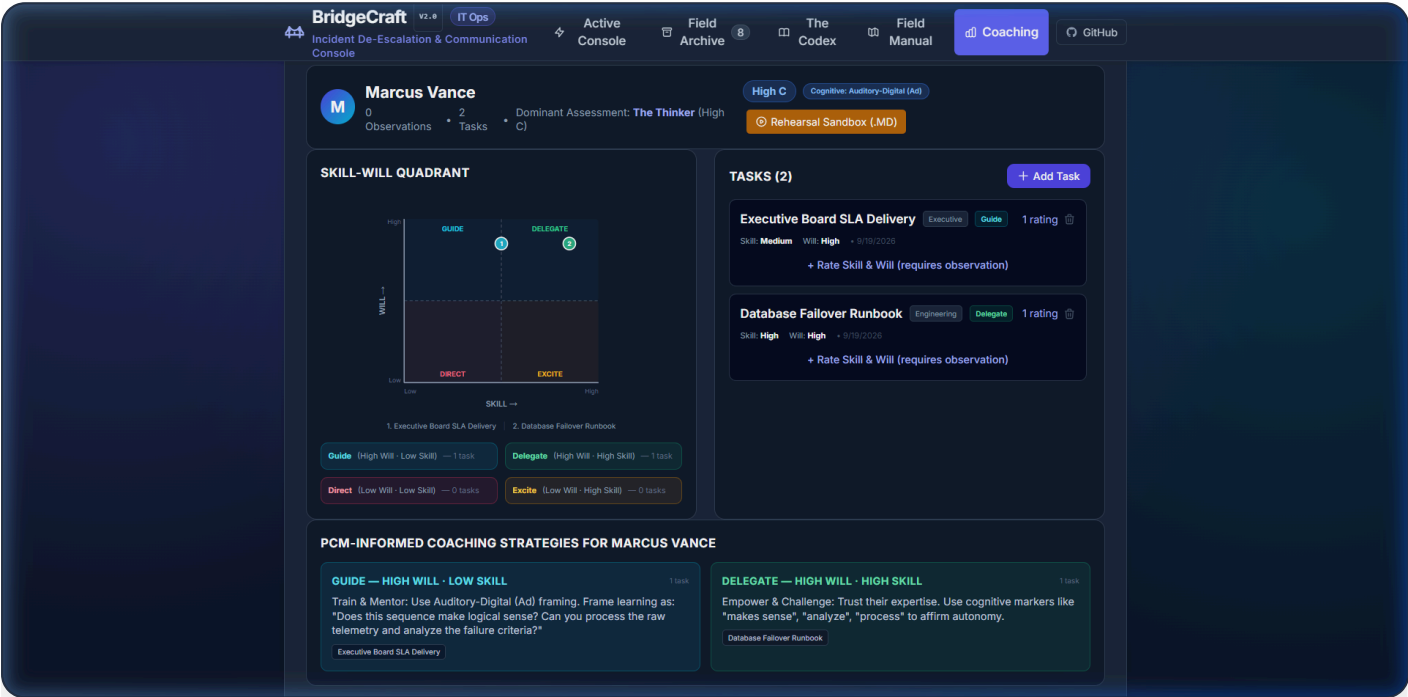

- **SVG 2×2 Matrix:** Plots tasks as interactive numeric badges in real time.
- **Task Tracker:** Manages task status, category tags, and historical notes.
- **Offline Local Storage:** Zero cloud footprint; persists completely in browser.

6. Tailored Coaching Strategies — Synthesizing Matrix with PCM

File:
screenshots/06_coaching_marcus_quadrant_strategy.png

The bridge between task delegation and psychological calibration. Automatically synthesizes the quadrant leadership stance (Direct, Guide, Excite, Delegate) with the stakeholder's dominant cognitive dialect, generating custom management scripts and contextual **Burnout & Fatigue Checks** for the Excite quadrant.

- **Synthesis Engine:** Combines "Guide (High Will/Low Skill)" with "Thinker" logic.
- **Burnout Context:** Prompts leaders to evaluate on-call load before assuming motivational loss.
- **Direct Rehearsal Export:** Includes *Rehearsal Sandbox (.MD)* button right in the header.
